

DEFENDING THE CHIROPRACTIC CASE START TO FINISH: HELP US HELP YOU

[John Floyd, Esq.](#)

August 19, 2017

This presentation will focus on the defense of the chiropractic physician in professional liability cases from the beginning of the suit through trial. After a brief presentation on some of the basic legal concepts involved in professional liability claims and the defense of the chiropractic physician, the seminar will focus on one of the most controversial and oftentimes, the most devastating claims of vertebral and carotid artery dissections that are generally attributed to the chiropractic physician's treatment. Mr. Floyd will take the audience through the actual trial of a chiropractic physician who was alleged to have caused bilateral dissections which resulted in permanent brain injury. During the presentation, the audience is encouraged to ask questions and provide opinions on the subject matter.
