

ADVANCES IN X-RAY IMAGING

Richard Cole, DC, DACNB, DAAPM, FICCN, FICC(H)

August 20, 2017

In this presentation of updates pertaining to diagnostic imaging, Dr. Richard Cole will provide a short review of what we know in the areas of radiographic anatomy, positioning and physics. He will also explore challenges related to special projections and managing problem patients that are encountered in the chiropractic clinic. Additionally, Dr. Cole will discuss advanced imaging protocols and will take a virtual tour through an imaging facility to review CT, MRI and Bone scans. Presentations will be interactive with attendee participation encouraged.
